

I urge you to reconsider any proposed telephone privacy laws that would lessen the impact of Indiana's State Telephone Privacy Laws. Since it's implementation, I now receive less than 3 unsolicited calls per week. Prior to the state law, I received 8-12 calls weekly. Please leave this subject to the states. Everytime the Federal Government get involved the issues get confused and it winds up costing the taxpayers more! If you want to legislate something important, why not address porno and lewd subject matter that our children are subjected to on television?

Thank You: Bob Howard-Ft. Wayne, IN
